FINDING A CURE

The Cure Bowl is more than a game. It's a celebration of those who are living with cancer today and those who will face it tomorrow. It's a rally cry to the world to raise awareness and help bring an end to this deadly disease once and for all.

The Cure Bowl is an NCAA college football bowl game played each December in Orlando, Florida. The Cure Bowl is a platform that helps raise funds for individual cancer researchers, like Dr. Annette Khaled, at the UCF College of Medicine .

IMPACT OVERVIEW

Total Impact
\$66,424,000

rating by Charity Navigator,
and named a 4-star charity
for accountability,
transparency and finance

(as of FY24)

78%

of all dollars raised
by OSF go to fund
cancer research &
awareness.

"Dr. Annette Khaled, Head of the **Cancer Research Division**, Professor and Assistant Dean at the University of Central Florida College of Medicine, is leading our research. Dr. Khaled's research has led to the discovery of a method to stop cancer cells from **breast, prostate, and pediatric tumors** from spreading through the body. With her therapy hitting all the milestones to be eligible for future clinical trials, **Orlando** has become a center for showcasing emerging and **innovative cancer therapies**."

THE EPICENTER FOR CANCER SCIENCE

"Dr. Khaled has focused on defeating the deadly disease for (more than) 20 years. Funding that supports this research comes from Orlando's Cure Bowl, which has provided (more than) \$6.35 Million in support."

Alex Martins
Orlando, Magic
